LIFE SAFETY SOLUTIONS

WELCOME!

Thank you for taking some time out of your day to have a look at our company. As I look back at where we've come from, I have to say that I'm extremely proud of the business that we've built thus far. We didn't start this business in boom times, or with large investment backing. In fact, we started this business in the heart of the worst recession our area had seen in fifty years, and we did it with every dollar of savings we had. We believed that this terrible economic situation actually presented a unique opportunity that might never come around again, and that we needed to act on it - so we took a chance.

It was our belief that customers weren't just large faceless corporations with an endless supply of money, but that there were actually people in those businesses that cared about how the job was done, how the reports were delivered, and that they actually noticed the service providers that would go above and beyond the call of duty.

The "opportunity" was the recession.

The downturn allowed the maintenance managers and HSE Advisors a chance to look at alternative vendors in a time where there was a huge cash crunch and massive budget cutbacks. A time where prices for services all of a sudden mattered more than "who we've always used". We brought a new company to the table that didn't have a lot of overhead, but rather, a group of skilled technicians with a burning desire to get in the door and get a shot at doing things better, and cheaper than our large competitors.

We worked hard, and continue to work hard - and the business model worked, and continues to work today. We are the same guys, doing our best to provide the best service we can for the best price we can. We thank you for the opportunity, and for considering us to provide services to your company. We look forward to exceeding your expectations.

Sincerely,

Ben Baker, President

The Total Group of Companies

Fire | Rescue | Safety | Medical

At the Total Group, each of our six specialized divisions stands strong on its own, but together they deliver unmatched synergy, seamless communication, and substantial cost savings to our clients..

Instead of juggling multiple contractors, you get one team, one standard, one solution

From NFPA Technicians and Firefighters to Engineers, SPRAT & ITRA Level 3 experts, CRSPs, NCSOs, EMTs, Paramedics, and Professional Trainers — we bring you the best of the best, under one roof.

Our divisions are COR certified, and we are members in good standing with ISNetwork, Complyworks & Avetta

Being in the right spot at the right time has always been a factor. We currently have locations across the continent where we can mobilize manpower and equipment. Central Alberta, Canada is the hub for our North-Western American Operations. We successfully dispatch crews on projects from the west coast of British Columbia to the southern border of Colorado and beyond.

Our central Ontario location is key in moving personnel across Canada's most populated province, and to the east coast, and also provides a valuable resource to our US branch that is located in Houston, Texas which assists with providing technical expertise and logistical support for projects that happen on the south-eastern side of the border.

No matter where you are located in North America, we have the resources, manpower, and technical expertise to ensure your project gets completed on budget, and on-time.

Kimberley, BC - Canada

Red Deer, AB - Canada

Sherwood Park, AB - Canada

Winnipeg, MB - Canada

Toronto, ON - Canada

Houston, TX - USA

The Advantage

Synergies that exist within our structure create a unique opportunity for customers to “double down” on services that they use everyday. Confined Space Rescue, Standby Firefighters, EMR's - coupled with Fire Systems Service Technicians, Rope Access Technicians, Safety Program Auditors, Safety Advisors & Paramedics - we bring everyone together under one umbrella and work together to get the job done in the best way possible.

FIRE DIVISION

Total Fire delivers complete protection, from fixed and semi-fixed systems to portable units, foam injection, fire extinguishers, sprinklers, and more. Fire protection isn't optional it's essential. That's why our services are built on strict adherence to NFPA codes across North America.

We provide not only expert testing, inspection, and maintenance, but also the technical documentation you need to stay compliant. Our friendly, knowledgeable technicians take the time to explain issues and walk you through solutions — so you're never left in the dark.

With our custom reports, you'll see exactly what needs attention and how we'll get you back into compliance quickly and efficiently. When you partner with Total Fire Solutions, you can trust the job will be done right the first time.

RESCUE DIVISION

When risk can't wait, neither do we. Total Rescue delivers standby rescue teams, rope access specialists, and rapid-response solutions designed to protect lives and keep operations moving in high-risk environments.

We provide a full service rescue division, with highly qualified technicians that are ready to handle your unique challenges.

At the heart of our expertise is our state-of-the-art technical rescue and confined space training facility in Fergus, Ontario. Purpose-built to simulate real-world hazards, it ensures our teams — and yours — are always trained to the highest standard.

Your life. Your team. Your peace of mind. Trust Total Rescue to make safety your strongest asset.

SAFETY DIVISION

Safety is not just a word that we throw around lightly. We take great pride in our internal safety processes and programs, and provide our customers with professionals with designation for a variety of projects - from ERP development, to COR certifications. Safety Professionals - CRSP & NCSO, Certified Auditors, Professional Trainers, Safety Code Specialists are some of the people that we have available to assist with your projects.

At Total Group, we are dedicated to delivering top-tier Health, Safety, and Environmental (HSE) solutions to ensure the well-being of your workforce and the sustainability of your operations. With a strong focus on compliance, risk mitigation, and safety culture development, we help businesses across industries create safer work environments, reduce incidents, and meet regulatory requirements.

We are proud of our safety record and are members in good standing with the following safety organizations:

- Safety Advisors
- COR Audits & Planning
- Safety Program Development
- Procedure Development
- Industrial Hygienist
- Decontamination Trailers
- Asbestos Remediation
- OHS Testing
 - Drug & Alcohol
 - Audiometric Testing
 - Quantitative Fit Testing
 - Background Screening
 - Fitness Testing
- AED Inspections & Installs
- 3D Immersive Site Plans

TURNAROUND DIVISION

From day one, our goal has been simple: do things better. We know that adding manpower can dilute quality, which is why every team member goes through a strict pre-qualification process and mandatory in-house training.

Led by experienced Safety Leads and TAR Advisors, our teams stay small, skilled, and focused. And if we can't deliver the quality you deserve, we don't take the job. It's that simple.

Specialized Equipment

The equipment we provide is no different - we have made significant investments in our assets, and do our best to keep them in excellent condition. We are a full service company and can offer all of the resources you need to get the job done, and more!

EMERGENCY RESPONSE

As an industry leader in Fire Protection Certification and Maintenance, we can also provide our clients support services and response capabilities for large scale fire and spill emergencies. Some of the services we provide are:

5000 GPM Mobile Fire Pump

At the heart of any large fire & spill response is a fire pump, and there isn't a larger fire pump in the world than the 5000 GPM trailer mounted unit we provide to our clients.

This pump is rated for 5000gpm @ 150psi, and can flow up to 7500gpm @ 85psi. This pump is equipped with 6, 5" Storz discharge ports as well as 1, 10" for tying into large systems or other high-flow delivery devices.

Digital Foam Injection Pump

Large tank or berm fires require the delivery of firefighting foam solution at precise rates and high flow. To accompany our Fire Pump, we have a diesel powered foam injection pump.

This pump can precisely inject foam concentrate at a 3% rate, up to a maximum flow of 5000 GPM of foam solution, with a maximum discharge pressure of 200psi.

Foam Concentrate - Fire Hoses - Ground Monitors - NFPA Certified Firefighters

To supplement our Fire and Foam Pumps, Total Fire Solutions maintains a stockpile of foam concentrate, as well as the high-volume hose and appliances to deliver the solution.

- 3000 Gallons of AR-FFFP Foam Concentrate
 - 4000 feet of 5" High Volume Fire Hoses
 - 1250 GPM Master Stream Monitors
 - NFPA 1001 & 1081 Certified Firefighters
-

EQUIPMENT SALES & RENTALS
